

IN THE SPECIFICATION

Please add the following paragraph after paragraph [0021] of the present application:

[0021.1] FIG. 3 is a flowchart of a sampling process of the disclosed inventions.

Please add the following paragraph after paragraph [0027] of the present application:

[0027.1] FIG. 3 is a flowchart of a sampling process of the disclosed inventions. In this particular embodiment, for each respective line, the present inventions determine which of a plurality of orientation classes the entire line falls into (step 301). The present inventions then perform subpixel sampling using one of a plurality of sampling patterns, in dependence on which orientation class the line falls into (step 303). The present inventions then determine if there is another line to be sampled (step 305). If there is, the present inventions repeat the process for that line (back to step 301).
